

1、这是一千年之后的时代，一艘孤独的船漂浮在污染且被废弃的海洋上，周围是末日废土的场景

1. If humans don't do anything to protect the oceans, this is a thousand years later, a lonely ship floating in the polluted and abandoned ocean, surrounded by the scene of the apocalyptic wasteland

2、它的船身上爬满了奇异的海藻，有些甚至发光，显得格外神秘。船上的金属表面已经被海水侵蚀，但奇迹般地仍然屹立在污染的水域中。

2、The ship's body was crawling with strange seaweed, some of which even glowed with a mysterious appearance. The metal surfaces of the ship had been eroded by the sea, but miraculously still stood in the polluted waters.

3、废弃的高楼大厦仍然若隐若现地矗立在水中，成为奇特的水下景观。这里的动植物生态发生了变异，适应了污染和气候变化。海洋中漂浮着由人类活动产生的垃圾，同时有一些奇特的陆地生物的出现（颜色可以较为鲜艳，造型奇特）

3. Abandoned skyscrapers still stand hidden in the water, making for a strange underwater landscape. The ecology of plants and animals here has mutated and adapted to pollution and climate change. The ocean is floating with garbage generated by human activities, while there are some peculiar land creatures appearing (the color can be more bright, the shape is peculiar)

4、然而，这艘船突然被一个漩涡卷入其中，它下坠到了深海海底。他们惊奇的发现，在这个被人抛弃的世界里，依然存在着一座巨大的海洋馆，这个海洋馆的墙壁是透明的巨大鱼缸，里面栖息着由海洋生物变异而来的独特种类。巨型水母、发光的蝴蝶鱼、拥有特殊感知器官的鲨鱼，等等。

4. However, the ship was suddenly caught in a whirlpool and it descended to the bottom of the deep sea. They are surprised to find that in this abandoned world, there still exists a huge oceanarium whose walls are transparent giant fish tanks inhabited by unique species mutated from sea creatures. Giant jellyfish, glowing butterfly fish, sharks with special sensory organs, and much more.
